Tools & Workflow

- Git & GitHub
- Remote collaboration & version control
- Performance optimization & debugging
- Production deployment support

Professional Experience

Senior Web / Back-end Developer (Remote)

BillionaireCEOInspires Ltd – United States
2022 – Present

- Designed and developed backend services using Node.js and Next.js to support scalable web applications.
- Built and maintained RESTful APIs for data handling, integrations, and application logic.
- Integrated third-party services including payment gateways and communication APIs.
- Collaborated with distributed international teams to deliver secure, production-ready solutions.
- Optimized server-side performance and application reliability for real-world usage.

Senior Web / Back-end Developer

Troloppe Property Services Ltd – Lagos, Nigeria
2021 – 2023

- Developed a full-stack real estate platform from scratch, handling both frontend and backend architecture.
- Implemented backend modules for listings management, payments, CRM functionality, and automation.
- Designed server-side logic and database interactions to support high-traffic usage.
- Improved system performance, security, and scalability.

IT Support Officer

Affordable Cars Ltd – Lagos, Nigeria
2022 – 2023

- Resolved over 200 technical support issues, maintaining high system uptime and reliability.
- Supported backend systems and internal tools used across departments.
- Implemented proactive maintenance practices, reducing IT-related downtime and costs.

IT Manager

Clearedge Media Ltd – Lagos, Nigeria
2020 – 2022

- Led IT operations and backend system support for internal and client-facing platforms.
- Improved infrastructure efficiency and system security across company operations.
- Implemented digital solutions that increased productivity and workflow efficiency.

Web Developer / Digital Marketer

DSM Properties Ltd – Lagos, Nigeria
2019 – 2020

- Built and maintained web platforms with integrated backend functionality.
- Implemented SEO-driven optimizations supported by performance-focused backend improvements.
- Executed digital strategies that increased traffic and lead generation.

Key Projects

ScriptishRx – Voice Communication Platform

Website: https://scriptishrx.net
Tech Stack: Node.js, Next.js, React.js, Tailwind CSS, Twilio Voice API

- Built a full-stack application using Node.js and Next.js, handling both backend and frontend responsibilities.
- Designed server-side API routes to manage voice sessions, call flows, and Twilio webhooks.
- Integrated Twilio Voice Agent for real-time voice communication and automated call handling.
- Implemented asynchronous backend processes to manage call events and system state.
- Ensured secure handling of environment variables, API keys, and production configurations.
